Tina,

I looked into the Chl. a on Hyalite Creek and it is as you stated, the 6 rock method was high. We (TMDLers and MASers) need to meet about the new data collection on upper and lower Hyalite Creek and we will discuss delisting the segment below the dam by not using the 6 rock data. Right now I'm open on Feb 1.

Darrin,

I hope to finalize my review of the delistings by next week. Did you want to sit down and discuss Hyalite Creek and finalize any outstanding delisting issues? If so, would next Friday work to meet? just let me know.

Tina
